

SATRON Instruments P&P AB obtains order i Algeria

Satron Instruments has since many years been successful in the Middle East region. Several major field instrument deliveries including engineering, erection supervision, commissioning and staff training have recently been performed in the area.

As a continuation, Satron:s engagement now has reached North Africa when Metso Paper Karlstad AB chooses Satron as supplier of the whole field instrument scope for a Greenfield Tissue Machine Plant with Recycled Fibre Line situated in Algeria.

Satron supplies measuring equipment for pulp consistency, pressure, level, flow, temperature and pH. Furthermore all control- and on/off-valves are included in the scope. Erection supervision, commissioning and staff training is included as an option.
